

# White Light Spinners

## Equipment Required:

Scissors

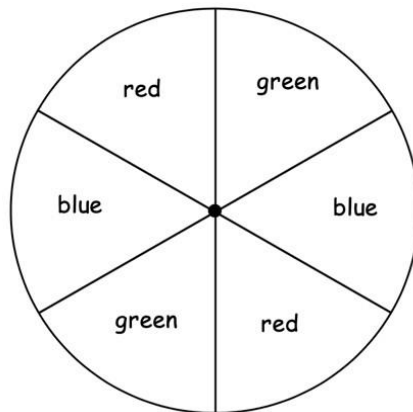

Red, green and blue pencils/felt tips

Copy of the template at bottom of page (if not draw your own)

Cocktail Stick (halved) or similar

## What to do

1. If you can't print the template below the copy the diagram onto white card or paper.
2. Colour in the template as shown below.
3. Cut out the circle (this should help clear up any overshoots of colouring in)
4. Half a cocktail stick and push it through the centre of the circle. Try to keep the seal tight so it doesn't slip when rotated.
5. Spin as fast as you can to try to get the colours to merge.
